Hello, Vivian –

In speaking with the team,
they are thinking that the fact sheet would be short, e.g., one page sheet,
front & back,
and the content would be along the lines of what I noted below, the key messages being what is
happening, and how that work will address the environmental contamination at the site.

One thing I forgot to ask the team but will do so now: any recent and/or good photos of the site that
could be used in the fact sheet.

Feel free to call if you have any questions, need other info, etc. Cheers – Julie

Hi, Vivian –

Attached is the draft fact sheet / info on EMF.

My sense re: what should/could be in the fact sheet would be...

- current cleanup work on the soils and groundwater at the Simplot Don Plant and the FMC property
- updates on:
 - o past work
 - o current work
 - o future work
- re: current and future work, there could be an update on where the site is at in terms of the longer-term Superfund process and the 5-Year Review process

...but, mind you, I'll check this with the team during the meeting this afternoon ;)

I hope this helps for now. Please let me know if you have any questions.

Cheers – Julie

Julie

It seems like this is the last version of what I have on Kay's draft fact sheet. However, I don't think it was her latest. My recollection is that I provided verbal thoughts and comments to her instead of written ones.

Sorry I can't seem to locate the later versions.

While I haven't managed to carve out time to actually ***craft*** a draft fact sheet, I've at least been able to pull together text from several sources. I've just dumped them into a Word document (attached). If you have time would you take a look at it and just red-line out everything that's inaccurate, and add anything that's current? Don't worry about crafting the language at this point, let's just pull together the facts and I'll check in with you to get the finer points when I'm back in the office next week.

The sources of the text are noted in the attached document.

I'll be out of the office for the rest of the week. Thanks for your patience.

k
